

FCC:

Does the NAB have a right or even an obligation to inhibit the availability of any information provided to me as a subscriber to satellite radio? I THINK NOT.

I will do whatever is necessary to protect my rights and freedoms to pay for and receive information available from sources that I select.

The liberal biased NAB, like most other sources of public information has the distinct desire to stop the dissemination of information that can and will influence individuals with points of view different from the NAB and the other biased liberal media outlets.

I will continue to follow this threat to my freedom of speech rights and I will voice my opinion where it counts the most, the ballot box, to continue the truths that make this country great.

Best regards,

Calvert R. Bratton
